Algebra Notes / Adding and Subtracting Integers

If the signs are the same
Add them up and keep the same sign.

$$8 + 10 = 18$$

$$-2 + (-5) = -7$$

$$-10 - 6 = -16$$

If the signs are different
Find the difference (Big # - smaller #)
take the bigger #'s sign

$$\begin{array}{l} -10 + 16 = 6 \\ 16 - 10 = 6 \end{array}$$

$$\begin{array}{l} -20 + 5 = -15 \\ 20 - 5 = 15 \end{array}$$

$$\begin{array}{l} -15 + (+8) = -7 \\ 15 - 8 = 7 \end{array}$$
