Combining like terms in a quadratic expression

$$\underline{9x^2} - \underline{2} - \underline{17x} - \underline{6x^2} - \underline{15x}$$

$$3x^2 - 27x - 2$$

$$\underline{8x^2} - \underline{7x} + \underline{4} - \underline{2x} - \underline{11x}$$

$$8x^2 - 20x + 4$$

$$\underline{-5x^2} - \underline{4} + \underline{2x} + \underline{12x^2} - \underline{9x}$$

$$7x^2 - 7x - 4$$
