MGF Notes / UNF Lecture Order

Week 1

[Intro](#)
[IKC](#)
[Discussion](#)

Week 2

[Identifying equivalent and equal sets for a real-world situation](#)
[Introduction to shading a Venn diagram with 3 sets](#)
[Computing the unpaid balance for a credit card statement](#)
[Using the ALEKS periodic deposit calculator to compute savings which...](#)
[Scalar multiplication of a matrix](#)
[Experimental and theoretical probability](#)
[Writing a multi-step inequality for a real-world situation](#)
[Interpreting Venn diagram cardinalities with 2 sets for a real-world...](#)
[Union and intersection of finite sets](#)
[Understanding quantifiers](#)
[Finding x- and y-intercepts of a line given the equation: Advanced](#)
[Addition or subtraction of matrices](#)
[Experimental and theoretical probability](#)
[Identifying independent events given descriptions of experiments](#)
[Writing a linear inequality in two variables given a table of values](#)
[Finding the principal, rate, or time of a simple loan or investment](#)
[Identifying solutions to a linear inequality in two variables](#)
[Integrated Excel 1](#)

Week 3

[Graphing a line given its equation in standard form](#)
[Interpreting a tree diagram](#)

Week 4

[Addition or subtraction of matrices](#)
[Constructing 3 Venn diagram](#)
[Shading 2 to see if equal](#)
[Graphing a linear inequality in the plane: Vertical or horizontal...](#)

Week 5

[Counting arrangements of objects that are not all distinct](#)
[Counting principle with repetition allowed](#)
[Solving a system of linear equations using substitution](#)
[Solving a system of linear equations using elimination with addition](#)
