Stats / Finding outliers in a data set

Problem

Explanation

Show Another

Finding outliers in a data set

QUESTION

The following numbers of people attended the last 11 screenings of a movie.

116, 196, 196, 198, 199, 203, 204, 207, 210, 211, 295

Identify all values that are outliers.
If there is more than one outlier, separate them with commas.
If there are no outliers, click on "None".

*these numbers are far away
from the rest of the
numbers*
